

May 3, 2017 - Tax Parcel Viewer Updates:

- Parcel data has been updated
- Address data has been updated
- Advance Search Update: 
 - The Advanced Search option has been updated to support spatial filters. When searching for areas based on acreage size, a spatial filter drop-down menu allows a user to select from two options: one to return features based on map extent, and a second that allows the user to return features that intersect a shape (drawn by the user).
