

Practicing good hygiene is essential to prevent the spread of COVID-19

Customers and visitors are to cover their mouth and nose with their sleeve or a tissue when coughing or sneezing and to avoid touching their face, in particular their mouth, nose and eyes, with their hands. Dispose of tissues in provided trash receptacles and wash or sanitize your hands immediately afterward. Respiratory etiquette will be demonstrated on posters and supported by making tissues and trash receptacles available to all employees, customers and visitors.

Social Distancing Protocol

Customers and visitors must follow social distancing best practices while present in county buildings. Specifically:

- Stay 6 feet away from others.
- Avoid contact with others whenever possible (e.g., handshakes).
- Avoid touching surfaces that may have been touched by others when possible.
- Distance yourself from anyone who appears to be sick.
- Avoid gathering when entering and exiting County workspaces. Only enter and exit designated areas.
- Follow any posted signage regarding COVID-19 social distancing practices.
- Avoid using common areas.
- Don't crowd elevators and maintain social distancing. Consider riding one person at a time and wash your hands or sanitize after touching elevator buttons.
