PURPOSE: It is reasonable to assure that employees, due to the nature of their positions and authority, do not take advantage of their position or appear to be using the system for personal gain. Within this context, certain restrictions are important to define this assurance.

A. Employees and their relatives shall not receive any remuneration from the Department, directly or indirectly, other than the prescribed compensation system for their particular and specific position. In certain circumstances, and for the benefit of the Department, the Director may waive this ruling and temporarily permit normal and reasonable payments to employees for additional services rendered within the realm of all other County personnel policies.
