

MEET THE TEAM

Catlett & Calverton Wastewater Treatment Project

The construction on the CCW TP is finally underway. This CCTWP Construction Newsletter will go monthly with updates on progress. Fliers will also be hung around the area with additional information. And Tim Harms is available to you to answer questions and hear comments. See Tim's contact info below.

Here, we focus on some of the people working together for years to bring the CCW TP to a reality.

Catlett & Calverton folks have dedicated hours of their time to represent the needs and views of each community - Sara Lee Armstrong, Jim Craun, Charlie Padgett, Joel Barkman, and in the past, Virginia Copeland and Will Russell.

Other important people -- The "design" part of the Design-Build Team is Bowman Consulting.

Bowman Consulting was formed by Gary Bowman in Chantilly in June of 1995. Beginning as a 5-man shop running in a basement office, today Bowman has 500 skilled professionals in over 30 offices across the U.S.

Our design engineers included Kenneth M. Baybutt, PE, Robert Krallinger, PE, and Jessica M. Kwiatkowski, PE. These 3 engineers bring 91 years of experience, collectively - experience that will prove itself in the kind

of "decentralized treatment system" that is providing an affordable system for these two service areas in Fauquier. Their design

has been successfully approved and permitted by the Virginia Department of Health.

The "build" part of the Design-Build Team is **English Construction**.

This firm was formed in 1909 and continues as a fourth-generation family-owned business. Its work is focused in Virginia and surrounding states.

Paul Johnson, Henry G. Myers (left) and Charles "Chase" Maurhoff (right) will lead

construction of the CCW TP. Mr. Johnson is project manager on this

construction. Paul joined English in 2012, following

over 25 years running his own excavation business in Virginia.

Mr. Myers has been with English since June 1998 after UVA

awarded him a Civil Engineering degree. Mr. Maurhoff began his

career in construction as a plumbing helper and HVAC

apprentice. At English, he has

progressed to Project Coordinator, Assistant Project Manager, and Project Manager.

Tim Harms, CCM of Downey Scott, and his colleague **Kevin Fallin, PE**, are representing the County's interests in monitoring construction and its progress over the next 18 months.

Future newsletters will introduce other members of the Team, with pictures of Tim and Kevin!
