

Metal

Accepted at the following locations:

Catlett
Corral Farm
Markham
Marshall
Morrisville
New Baltimore
Remington

Scrap metal pile at Corral Farm

How to Prepare for Recycling:

- All materials containing metal, both ferrous and non-ferrous, are recyclable.
- Small metal objects such as nails, bolts, horseshoes, and hand held gardening tools, etc. should be placed in the small metal objects container.
- Other metal items, such as empty paint cans, etc. can be placed in the scrap metal bulk container.
- Larger metal items should be recycled in the bulk metal containers at all location or in the scrap metal pile in the Bulk area at Corral Farm.
- Metal items such as lawn mowers, weed eaters, roto tillers and other yard equipment must be drained of all fluids before recycling in the Bulk area at Corral Farm.

Why Recycle?

In FY18, Fauquier County diverted approximately 1,887 tons of scrap metal from the landfill.

According to the Steel Recycling Institute, US steel recycling saves enough energy to power one-fifth of American households for one year.
