Subject: Cad Consultant for Fire and Rescue

Gentleman,

The Fire and Rescue Chiefs and the Association have been discussing for months as the communications center has presented the CAD updates and discussions on pursuing Central Square vendor.

In consulting with our DFREM team members and the Fire and Rescue communication committee members we feel it would be prudent that as we move forward with such a large software upgrade that we pursue working with procurement to hire a consultant to make sure we our specking and building the right Cad system for public safety but especially The fire side add on fits our performance.

We feel since the Cad has always been primarily built for the Sheriff's office and modifications have been made for some functionality to operate the fire side it would be wise to have an expert on board to make sure we our building the proper system. There our several criteria we feel Cad should offer fire that has not been available in the past as well as performed poorly for decades.

The most important part is we have an outside source helping to write the specifications that can establish the right criteria to bid out but as well as measure the performance once we contract and award to make sure we are receiving what we asked for.

The VFRA has allocated the funds (for the last two years) to pay for the consultant and would like to get them committed before carry over.

Thank you for your consideration

President
Tom Marable
