

2024

Team of the Month

August

Congratulations to the Information Technology department for being named Team of the Month for August 2024. They are being recognized for their outstanding work and quick response to ensure the County's network and systems were up and running after the nationwide outage of the CrowdStrike EndPoint Protection system.

In the early morning hours of July 19, 2024, a member of the IT team noticed a problem with the system. The quick response and reaction from the team ensured that our public safety systems were focused on first for the safety of our community. During the event, pertinent information was communicated in real time to ensure that the County workforce was informed and understood what steps were being completed.

This level of commitment demonstrates how this team went above and beyond to deliver outstanding customer service to our County departments, which allowed for minimal disruption of service to our citizens. We are thankful for the example set for their fellow employees.
